Essay Topic: What Are the Pop Culture Stereotypes?

Over the past, American popular culture has been strong in creating racial stereotypes. Images displayed through television, music, and the internet have an impact on how individuals behave and what individuals believe. People find their identities and belief systems from popular culture. Evidently, I believe that American pop culture has created racial stereotypes that predominantly affect other ethnic minorities. Analyzing the history of America reveals that African Americans have always had a problem defining themselves as Americans ever since the era of slavery. African Americans have always had a hard time being integrated into American culture. The result is that African Americans have been subjected to ridicule and shame. American pop culture has compounded the problem by enhancing the negative stereotypes of African American. In theatre, film, and music, African Americans have been associated with vices such as murder, theft, and violence.
